## BLADEPRO 3D: INCREASED PROFITS, NO STRINGS (STAKES OR GRADE CHECKERS) ATTACHED.

Just What You'd Expect From The Company That Brought

**You The World's First Automatic 3-dimensional Control System - In 1995.**

BladePro® 3D seamlessly combines Spectra Precision's design software, robotic total stations to provide the position and elevation information, and BladePro motorgrader control system to automatically control the elevation and X-slope of the motorgrader blade for finish grading. A total concept to completion solution, BladePro 3D eliminates costly stringlines, stakes, and grade checkers. And by reducing engineering costs as well as improving accuracy and material yields, even your most complex jobs are sure to be completed on-time and on-budget. This revolutionary system is the result of Spectra Precision's unmatched capabilities involving everything from GPS to laser levels to the industry's first 3-dimensional machine control system in use since 1995. Call your local dealer for more information.
